Subject: The Subcontractor's Challenge for 2006

By almost all accounts, the outlook for the non-residential construction market in 2006 looks strong.

[Forward to a friend](#) 

Unfortunately, the never-ending "point-the-finger" nature of this business only means construction projects will generate more paperwork in 2006 than ever before.

As a subcontractor, that will probably translate to more documentation, even for the little things. The result? A paperwork nightmare that's already becoming almost impossible to administer manually -- even with standard office-management software.

That's where *Autodesk® Constructware for the Subcontractor®* can help you. This unique software program was created by subcontractors, and for subcontractors.

It's purpose: To help you document your projects in HALF the time, so you can focus more on higher-end project management activities.

See it in action! Join us on Thursday, May 18th from 1:30 PM - 2:00 PM ET for a complimentary, low-key, no-obligation web demonstration.

In only 30 minutes we'll show you how this program could help you document your projects better and in HALF the time.

Attendance is limited to 50 participants, so [register today](#) (it takes less than 1 minute).

Event Details

Topic: Document Your Projects in Half the Time: An Autodesk Constructware for the Subcontractor Online Demo

Date: Thursday, May 18, 2006

Time: 1:30 PM Eastern Time (10:30 AM Pacific)

Duration: 30 minutes

Where: Your desktop (it's an online seminar)
